

# *DON'T*

**drop your batteries!**

**Batteries in the backrooms charge through a special process by absorbing the liminality around them!**

**Dropping the batteries will upset this process, causing the batteries to release their charges. This is traumatic to the batteries, so be very careful!**

## **Reminder!**

To start charging your battery, just shake it softly to wake it up! It'll go back to sleep if you put it away, so make sure to hold it nice and high!
